wood-maxx.ca

The Wood-Maxx is the ultimate wood screw.

It has been specifically engineered and designed for manufacturers of solid wood or melamine furniture and kitchen cabinets. It features a long Type 17 (T17) cutter for quick drilling into even the hardest of woods. The specially designed cutting thread combined with our long T17 cutter eliminates the need for pre-drilling into most species of wood and sheet goods. We have incorporated a special zinc wax coating on all of our screws which reduces friction and stress. You will find that our square socket is deep for optimum driver bit penetration and performance. All of these features combined make Wood-Maxx the ultimate wood screw in the industry.

The Wood-Maxx is designed with a long T17 combined with the aster cutting thread and 21°- 23° sharp point. This allows the screws to be driven into even the hardest woods without pre-drilling a pilot hole.

The special Zinc Wax coating on the Wood-Maxx delivers unmatched performance, reducing the torque required to drive screws. This result is a reduction in user fatigue, which in turn will decrease the potential hazard of repetitive stress syndrome, or carpal tunnel, caused by the continuous driving of screws.

The Wood-Maxx thread is designed for single draw down in all types of wood. The wood dust is forced up and out of the hole, eliminating the need to back the screw out and re-drive to achieve tight draw down.

The Original **ROBERTSON** FASTENING SYSTEM

Insist on Original **ROBERTSON®** screws and driver bits. It's the only way to ensure a proper **"Cling Fit"**.

ROBERTSON® CLING FIT

ROBERTSON® bits and screws provide maximum recess penetration and "Cling Fit."

RECESS TOO NARROW

When the recess is too narrow, the driver does not penetrate deep enough into the recess.

RECESS TOO LARGE

When the recess is too large, the driver will wobble and come out.

INCORRECT RECESS ANGLE

When the recess or bit is at an incorrect angle, the driver will wobble excessively.

SAVINGS

The Wood-Maxx is a premium product line. The important consideration when switching to the Wood-Maxx is how much time and money the user will save. It offers greater efficiency, faster penetration, less waste and less strain and effort. The true savings achieved once you start on the Wood-Maxx program are many times more than the price paid for the screws themselves.

COMPETITION

No other screw manufacturer or screw importer has focused and designed its screw program specifically for the wood-working industry.

MANUFACTURING

The Wood-Maxx program is manufactured to the highest quality standards possible by Robertson Inc.

Applications & Head Guide

5 GAUGE

- Generic drawer slides (subject to Mfg. hole dia. specifications)
- Piano hinge applications.

6 GAUGE

- Generic drawer slides (subject to Mfg. hole dia. specifications)
- Piano hinge applications.
- Furniture backs

7 GAUGE

- Highly recommended for use on all undermount soft close drawer slides.

8 GAUGE

- Multi-purpose wood screw.

9 GAUGE

- Multi-purpose wood screw.
- Offered as a 9 gauge for INCREASED sheer strength.
- Stair & Railing Screw

10 GAUGE

- Excellent Stair & Railing screw.
- Multi-purpose wood screw.
- HIGHLY recommended for high torque and sheer strength applications.

6 & 8 GAUGE PAN

- Small hardware assembly (i.e. L-brackets, Plastic cabinet levellers, Table legs etc.)

8 GAUGE TRUSS

- Small hardware assembly (i.e. L-brackets, Plastic cabinet levellers, Table legs etc.)
- HIGHLY recommended for ball-bearing slides

EURO SCREW

- Slides & hinges (for 5mm hole)

8 GAUGE ROUND WASHER

- Coarse thread recommended for soft wood applications.
- Kitchen cabinet & bathroom vanity installation.
- Epoxy coated head provides a clean finish to your project, and eliminates the need of cover caps to hide screw heads.
- 1 1/4" is the most common length for pocket hole applications.

10 GAUGE LARGE ROUND WASHER

- Coarse thread recommended for soft wood applications.
- Kitchen cabinet & bathroom vanity installation.
- Epoxy coated head provides a clean finish to your project, and eliminates the need of cover caps to hide screw heads.

TRUSS ROBERTSON MACHINE SCREW

- Handle and knob installation screw.

TRUSS ROBERTSON BREAK-AWAY MACHINE SCREW

- Handle and knob installation screw.

ANGLE BRACKETS

- Kitchen cabinet and vanity installation.
- Support of counter tops, corner assembly etc.

INDUSTRIES

- Construction
- Woodworking, Furniture MFG
- Window & Door
- Cabinetry
- Hardwood, Softwood, Sheet Goods

HEAD GUIDE

Flat

Flat with Nibs

Round Washer

Truss

Pan

A complete screw program designed exclusively for the woodworking industry.

Flat-head with Nibs

- Aid in the countersinking of the screw.

Smooth Shank

- Allows for better draw down.

Wood-Maxx Lo-Root® Thread

- Aid in the countersinking of the screw.

Unique Aster Cutting Thread

- No more pre-drilling.
- No more splitting of wood or panel products saving you time and money.
- Superior cutting and driving.

Cling Fit Square Drive

- #2 Robertson Square Drive on most of the product line.
- Good snug fit on original Robertson Driver Bits.

Zinc Wax Coating

- A special process unique to Wood-Maxx , that reduces friction.

Exclusive Long Type 17 Cutter

- Much easier wood penetration and quicker drilling time.
- Less stress on hands, arms and equipment.

INSTALLATION SCREWS EPOXY COATED

(Not Painted)

- No screw caps needed!
- No paint chipping or stripping.
- No clogging of driver sockets.
- Available Colours: White, Hard Rock Maple & Chocolate Pear

White

Hard Rock Maple

Chocolate Pear

ALL #6 WOOD-MAXX SCREWS HAVE A #2 SQUARE DRIVE

- No need to stop and change driver bits.
- Saves time and money.

BULK BUCKET AND GRAB HANDLE JARS

- Convenient transparent buckets and jars to monitor inventory levels at a glance.
- Free 2" driver bit included in each jar.
- Buckets have convenient carrying handle relieving back strain.
- Buckets stay intact even if in contact with moisture.

APPLICATIONS

#10 LARGE WASHER

- Kitchen cabinet & bathroom vanity installation.
- Epoxy coated head provides a clean finish to your project, and eliminates the need of cover caps to hide screw heads.
- **HIGHLY** recommended for high torque and sheer strength applications.

8-32 & M4 Handle Screws

Truss Robertson Machine Screw

◀ Machine screws feature an Original Robertson #2 drive, providing an excellent bit fit.

APPLICATIONS

Handle and knob installation screw.

Break-Away Handle Screws & Brackets

Truss Robertson BREAK-AWAY Machine Screw Breaks at 1/4", 1/2", 3/4" & 1"

Machine screws feature an Original Robertson #2 drive, as opposed to a square slot combo drive which are generally available. The #2 Robertson drive provides a better bit fit, as well prevents stripping of the screw.
